Other	Installation media provided via CD-ROM HP Laserjet Printer External media for backups (CD-RW, USB based storage devices, tape, etc.) Adobe Acrobat 6.0 or higher (to view admin manual) Internet Explorer 6.0 or higher (Computrition Website)

NOTE: Although Computrition products may operate on slower machines, these recommendations are to ensure optimum system operation. If a slower machine is used, the performance of Computrition software may be undesirable. Although every attempt has been made here to offer readily available equipment configurations, frequent changes/advances in technology and price/performance may render this particular configuration economically obsolete. Please contact Computrition before purchasing your specific hardware platform to ensure you have the current minimum recommended specifications.
