FOR IMMEDIATE RELEASE

Computrition Presents Pending Diet Orders

Computrition, Inc., a leading developer of hospitality, food management and patient care automation, is pleased to focus the spotlight on the newest functionality of its Hospitality Suite flagship product, Pending Diet Orders. It is the latest advancement to the innovative Hospitality Suite Diet Order Interface, with a primary objective of catering to a patient's fluctuating diet order by permitting changes to be inputted for future meals.

This supportive feature grants the ability to assign a future diet order or progression of orders for a patient based on the requirements of a specific condition. Subsequently, the pending order may be managed by the dietary staff as they are monitoring the status or any fluctuation of a patient's condition. Effortless automation offered through the Pending Diet Order module alleviates manual labor and develops efficiency through an accurate and proactive process.

Ninetta Massarelli-Cucci at Carillion Services WOHC, Toronto recognizes the benefits derived by the Pending Diet Order functionality, stating "This feature enabled us to accept all diets intended for future meal periods. With the click of a button, we routinely accept future diets for Breakfast, Lunch and Dinner meals with 100% accuracy." For an insightful demonstration on the functionality of Pending Diet Orders and further information, please visit: http://www.computrition.com/pending_diet_orders.htm.

About Computrition
