

Computrition Webinar Series

The following are a list of Webinar sessions that you can purchase by contacting arm@computrition.com.

HOW TO HSAUTOMAINT

This Webinar is for: Oracle DBAs, System Administrators, IT.

In this session, you will learn everything you need to know about how to:

1. Access the **HSAutoMaint Utility**
2. Display the **HSAutoMaint Help Screen**
3. Use HSAutoMaint to:
 - Clone/copy a dataset
 - Update a company
 - Export company data
 - Delete a company
 - Export a company using Microsoft Scheduled Tasks

HOW TO DELETE FOOD ITEMS WITH INVENTORY HISTORY

This Webinar is for: Application administrators and any users maintaining inventory and recipe files.

In this session, you will learn how to use the:

1. **Recipe That Contain Report** to find out in which recipes your ingredient(s) can be found.
2. **Recipe Maintenance** to replace an ingredient with another.
3. **Inventory Movement Details Report** to know all inventory history related to an item.
4. **Global and Individual Deletion** features for requisitions, orders, issues and inventory.

NUTRITION CARE MANAGEMENT (NCM) TABLES: AN IN-DEPTH REVIEW

This Webinar is for: Application administrators for new implementations and staff members involved in gathering data for table entry or entering table information.

In this session, you will:

1. Learn the rationale for certain **NCM tables** and their use in **Hospitality Suite (HS)**.
2. Be given examples of entries in certain NCM tables.
3. Learn the equivalent tables between HS and the **Classic Computrition software** (for conversion customers).
4. Learn the importance of table entry names and short names and their use in HS.

MEAL PATTERN DESIGN AND ASSIGNMENT

This Webinar is for: Nutritional care staff interested in learning how to create and assign meal patterns.

In this session, you will learn to:

1. Create a meal pattern.
2. Assign a meal pattern to a diet order.
3. Edit recipe values for patterns and acceptable portion sizes.
4. Set up **SmartSubstitutions** to work with meal patterns.
5. Review your SmartSubstitution reports.

OPERATING THE HL7 INTERFACE APPLICATION

This Webinar is for: IT and nutritional staff responsible for verifying that patient information is transferring from the ADT and Order Entry systems into Hospitality Suite.

Summary of Content: Overview of the HL7 Interface system and how to manage the application through the Web User Interface. You will also learn how to access the error logs, patient records, and determine whether the interface is processing records.
