

Hospitality Suite

Streamlining Foodservice Operations

In today's age, automating your foodservice and nutrition operations is no longer an option – it's a necessity. Professionals, just like you, are facing tremendous challenges in these areas that a manual process simply cannot solve.

At Computrition, we understand the complexity of a foodservice environment that includes food cost management, menu planning, inventory control, and labor management. In patient nutrition care, functions such as diet order management, menu administration, and tray ticket generation should be automated in order to maximize efficiency. Operators need a solution for these departments and Hospitality Suite® (HS) was engineered just for that purpose.

 Hospitality Suite™

Powered by Oracle® and built for today's Windows and Linux® operating systems, HS brings you the power to streamline your operations like never before. Our solution is comprised of three prominent applications – Foodservice Operations Management (FOM), Nutrition Care Management (NCM), and SuitePoint! Point-of-Sale (POS) – that can help you accomplish your goals, depending on the needs of your specific industry.

“Computrition’s system has brought our operations process consistency. Information relative to trends, benchmarking, or responding to patient concerns is readily available. We are all being asked to do more, with less. I am convinced Computrition’s integrated software solution allows my team to meet our every day challenges.”

Geisinger Medical Center

COMPUTRITION
FOODSERVICE SOFTWARE SOLUTIONS

Beyond Software, Computrition Delivers Quality Services

- Pre-implementation process that includes building your data file, along with an optional complete, customized data build
- Professional services ensuring that timelines are consistent with your budgeted goals and available resources
- Individualized training using a combination of on-site and web-based instruction
- Application support services that provide toll-free telephone support with the availability of optional extended hours
- A technical support team of Oracle Certified Professional database administrators (DBAs) who can perform functions ranging from network/hardware/operating systems support to turnkey services to full DBA functions
- A fully-hosted, managed service solution to all clients

Add-on Modules:

- Room Service
- Room Service Connect
- Tray InMotion
- Bedside Connect
- TouchPoint Dining
- Automated Menu Planning Suite
- Inventory Connect
- HL7-Compliant ADT Diet Orders Interface
- Web Recipes
- Web Menus
- Web Menus Mobile
- Nutrition Food Labeling
- Point-of-Sale Interface
- Kitchen Display System
- Video Display Gateway
- Label Elite
- Single Sign-On (SSO)
- Centralized Data Management Merge

FOM Highlights*

- Analyzes nutrient information at the food item, recipe and menu level
- Manages accurate inventory and ordering processes
- Assists with production needs based on menu requirements
- Improves forecasting procedures through a variety of reporting features
- Automates the central production kitchen for multi-site operations

NCM Highlights*

- Processes automatic patient menu substitutions and corrections based on likes, dislikes, and allergies (LDAs)
- Transmits patient information securely through an HL7-compliant ADT/Orders interface and maintains data via electronic cardex technology
- Produces tray tickets corresponding with patients' diet orders, allowing production staff to assemble tray appropriately
- Automates the labeling and tracking components of the tube feeding process
- Permits placement of multiple, successive pending diet orders at once

POS Highlights*

- Engineered for the Healthcare environment
- Perform employee charges, account charges, and customized declining balance accounts
- Real-time reporting
- Integrated with other functions of FOM
- Highest level of PCI compliance with credit card processor and point-to-point encryption of credit card information
