CONTAINS: Milk, Soy, Wheat.

In conjunction with Foodservice Operations Management (FOM), this solution can be used by any operation that either sells pre-packaged foods or serves menu items in cafés, dining halls or retail outlets. Instantaneously create labels that you can attach to products or print on easily readable placards to be placed throughout your servery.

With this module, not only will you be able to show your items' nutritional information, but you can also list their ingredients and associated allergens. You can also brand the product produced by your retail outlets by customizing the labels and placards with their distinct logos. Best of all, the labeling features meet 100% of the FDA's Code of Federal Regulations (CFR). Increase your customers' confidence in your products by providing them the nutrient information they want by using the Nutrition Food Labeling module!

Key Features

- Print labels and placards with your food's nutrient content
- Display the items' ingredients and associated allergens
- Brand products created by your retail outlets
- Compliant with the FDA's Code of Federal Regulations
- Powered by FOM

"Great job on the NFL module!...For starters, not only do the results look professional, clear and easy to understand, they look very much as hoped from our communications early in the development phase... Appreciate that the allergens and sub-ingredients are added at the item level, once and done. This was something we had to repeatedly do at the recipe level (allergens at least) with our old software."
