SUITEPOINT! POINT-OF-SALE

Today's military retail environment must be equipped with the right technology to streamline dining facility operations, deploy cashless meal card programs and deliver nutrition education. With Computrition's comprehensive and secure point-of-sale (POS) solution, you will improve the overall accountability of your branch by automating retail transaction processes.

Our premier POS solution has the functionality for full integration with Foodservice Operations Management (FOM) or just as a stand-alone solution. When provided with the right data, **SuitePoint! POS** can determine the eligibility of allowance for subsistence by capturing the information from the service member's Common Access Card (CAC). Having front-of-the-house data allows foodservice operators to analyze POS activity and adequately prepare for audits.

In support of performance nutrition initiatives, SuitePoint! POS can print receipts with corresponding nutritional and caloric values of menu items selected. Having this nutritional information is key to encouraging service members to make healthy food choices based on their dietary and training goals.

REVOLUTIONIZE THE RETAIL REVENUE PROCESS!

FEATURES

Browser-based application
for dynamic retail management

Easy-to-use touch screen register
with customizable interface

EMV chip and pin ready

with Computrition's back-of-the-house module

Robust hardware by POS-X
suitable for the foodservice marketplace and backed by a 5-year warranty

WE SALUTE

Computrition is honored to work alongside the following military groups:

- **United States Department of Defense (DoD)**
- **United States Department of Veterans Affairs (VA)**
- **Military Health System (Solution Delivery Division)**

We strive to strengthen the management of their foodservice operations and to help support the health and well-being of our nation's brave service members.

BENEFITS

Prints calories and nutrient information that corresponds with color-coding system on receipts and interfaces with digital menu boards *(requires Foodservice Operations Management)*

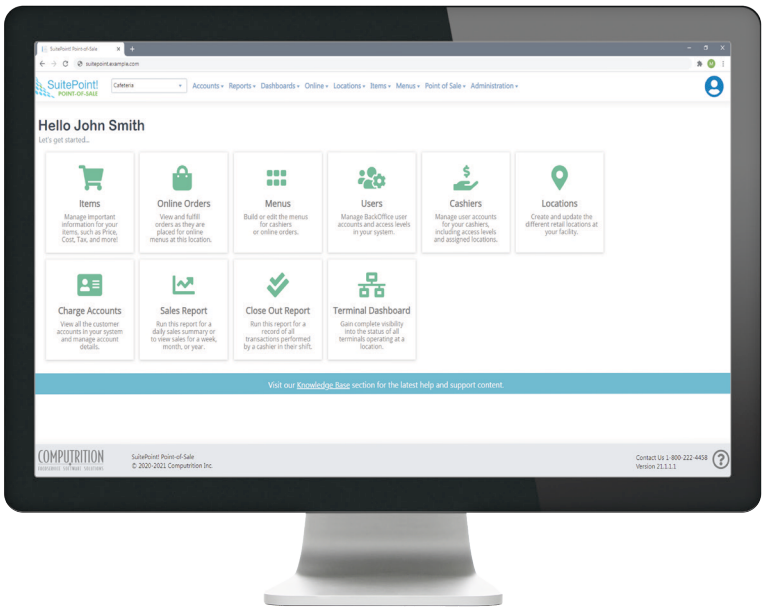
Offers multiple payment methods: cash, credit, discounts, coupons, payroll deduction, and entitlement through CAC recognition system

Provides endpoint encryption via VeriFone credit card processing for enhanced security

Stores data locally on the register; standalone mode prevents interruption in service if the network is not available

Increases register throughput, minimizing long lines and shortening wait times

Allows you to conduct thorough historical and forecasting analysis

ADD-ON MODULES


- **SPOON** *(SuitePoint! Online Ordering Now)*
- **Digital Menu Board Integration** *(when paired with Foodservice Operations Management)*
