

HS onTray |

Thanks to the progression of technology, many services are now available at your fingertips. For example, you can use a smartphone to order your favorite meal and get it delivered straight to your door. Why not provide patients with the same convenient experience to improve their hospital stay? As a Nutrition Care Management (NCM) add-on module, **HS onTray** can provide patients with the option to order their desired meals at their preferred times – all from the convenience of their mobile devices. Patients receive menu options customized to their prescribed diet order(s); HS onTray educates them on recipe options that may be restricted and/or contain a food allergy. Our thoughtful user interface is designed to prioritize the user experience and ease of use. What's more, HS onTray utilizes a device's web browser, meaning *no app download*.

From recipe creation and food preparation to how meals are ordered, tracked, and delivered, Computrition cares about what's on a tray.

RELIEVE STAFF AND BOOST SATISFACTION!

FEATURES

Fully integrated with Hospitality Suite and Nutrition Care Management (NCM) data

Enables staff to determine eligible patients from each patient's record in Hospitality Suite

Allows for multiple app customization options such as custom logos, listed nutrients, and menu item name displays

Supports both traditional and room service styles including option of tray delivery time scheduling

Lets patients order ahead for their future meals while providing a history of past orders

Offers menus customized to each patient considering diet restrictions and food allergies

Prevents patient over-ordering through menu item category limits (e.g., desserts)

Supports patients' personal mobile devices including Android smartphones and Apple iPhones and iPads

BENEFITS

Empowers patients to invest in their health and recovery

Provides patients with an educational opportunity

Reduces margin of error

Boosts cost savings on hardware

Alleviates long room service call wait times

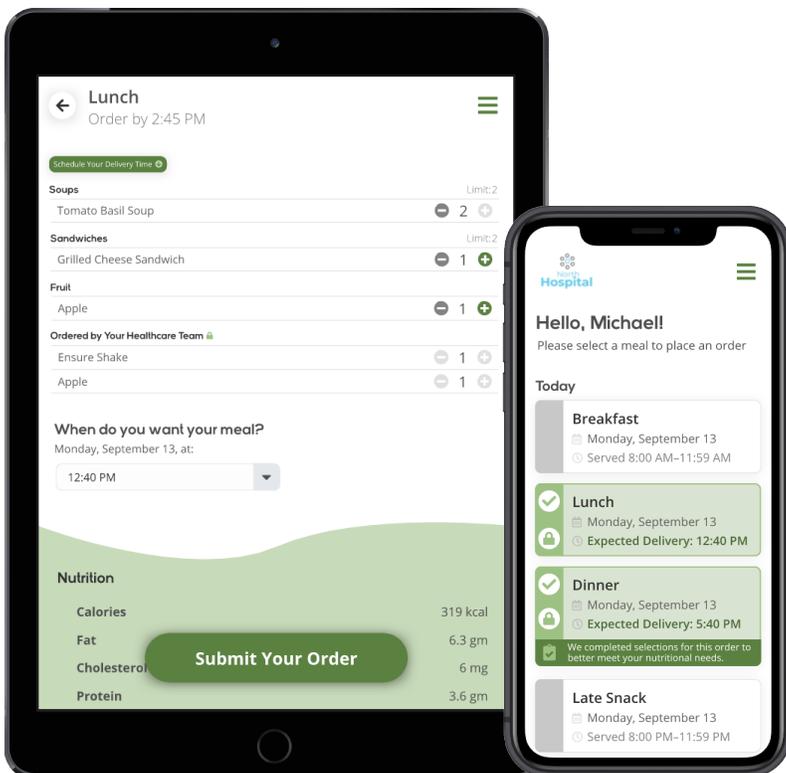

Offers a high-tech, convenient ordering experience

Doesn't require an app download or account creation

Increases patient satisfaction

USER EXPERIENCE = PATIENT EXPERIENCE

When it comes to designing the next generation of Computrition's browser-based applications, we are taking great care to ensure the success of all [users' experiences](#) regardless of their age, ability, or comfort level with technology. Computrition strives to consider the needs of all potential users and patients during the planning and development processes and to follow the most up-to-date accessibility guidelines as we build the future of our product line.
